

# COSCO HEAVY TRANSPORT

February 2014

## Quality Policy

The Joint Venture companies, COSCO Shipping Europe B.V. and COSCO Shipping Americas Inc., market and provide complete transport engineering management and project management for the vessels of COSCO Shipping Company Ltd., (COSCOL) under the trade name of COSCO Heavy Transport.

### COSCOL Quality Policy

Safety First; Quality Service; Compliance with applicable legislation; Rewarding our Shareholder;  
People Foremost; Protecting the Environment; Sustaining Development; Repaying Society

has been considered in specifying our Mission and Vision which defines the purpose of our organisation and is supported by the implementation of a Quality Management System according to ISO 9001.

Both the CEO and President, who assumes the role of Management Representative, undertake to:-

- Comply with the norm requirements, applicable legislation, regulations, norms and values
- Optimize the effectiveness of the management system through continual improvement
- Satisfy Customer requirements and strive to exceed expectations
- Create unity of purpose and direction, creating conditions for achieving the quality objectives
- Offering a safe and healthy environment for ship and shore based activities and considering COSCOL objectives
- Human development and empowerment of competent and engaged people to enhance creation of added value
- Take the process approach for achieving consistent and predictable results, together with the development of managed relationships with interested parties, particularly subcontractors and critical suppliers

This Policy document together with the Management system will be reviewed once a year at the time of the annual budget. The analysis and evaluation of data will serve to facilitate decision making based on facts and ensure the continuing sustainability of the management system, scope and objectives.

Published in the Quality Handbook this policy is available to all personnel whose commitment to the understanding of this policy document and implementation of the management system is integral to their responsibilities.

The policy is also applicable to suppliers and subcontractors and may be made available to interested parties when appropriate to meeting the corporate objectives.
